All LOUIS members participate in the electronic resources initiative.
Check the LOUIS website for a list of database titles.

Funding Sources

Electronic Resources are some of the most valuable and convenient library resources that faculty and students can use to enhance research and learning, and these resources can be accessed from anywhere at any time. These resources include formats such as ebooks and ejournals, full-text, indexing and abstracting, and reference databases, statistical databases, and multi-media collections.

EBSCO Discovery Service: Yes
LOUIS supports EBSCO Discovery Service (EDS). EDS brings together the library’s entire collection, including consortium-licensed electronic resources, locally purchased electronic resources, and print collections. It provides a single, customizable, search interface similar to that of Google’s, which maximizes the value and usefulness of the library’s collection.

All LOUIS members that subscribe to EDS through LOUIS have implemented the Curriculum Builder LMS plugin. This plugin provides access to databases, ebooks, and other digital resources found in the library’s discovery system directly from online learning management systems such as Blackboard and Moodle.

ILLiad ILL: No
LOUIS supports ILLiad, a resource sharing management software that helps automate routine interlibrary loan functions. It allows a library to increase staff productivity and reduces the paperwork associated with ILL. ILL is an important initiative that supports the consortium’s goal to further enhance member libraries’ collections through resource sharing.

LALINC Card: Yes
The LALINC Card is a reciprocal borrowing program. The LALINC Card is issued by the user’s home library and allows the holder to borrow library materials from any of the participating members. Each institution determines its level of reciprocity.

Reciprocity level = 4
0=does not participate; 1=faculty/staff only; 2=faculty/staff & grad students; 3=faculty/staff, grad students, undergrads restricted; 4=faculty/staff, grad students, undergrads, 5=Collection is mainly ER

How many academic libraries partner with LOUIS?
Members include academic libraries in the five higher education governing systems in the State of Louisiana, which include the Louisiana Association of Independent Colleges and Universities (LAICU), the Louisiana Community and Technical College System (LCTCS), the Louisiana State University System (LSU), the Southern University System (SU), and the University of Louisiana System (ULS).

LOUIS: The Louisiana Library Network is a project of the Louisiana Academic Library Information Network (LALINC), a consortium of public and private college and university libraries. This partnership, established in 1992 by academic library deans and directors, currently has 49 members, and is funded by LALINC members and the Louisiana Board of Regents.
