Special thanks to our 2015 sponsors!
Welcome to LUC 2015!

Welcome to LOUIS Users Conference (LUC) 2015! We are happy to return once again to the C.B. Pennington Jr. Conference Center. We have an exciting conference planned this year.

This has been a year of great change for the consortium, with more still to come. We seized the opportunity to migrate our SirsiDynix Symphony system from a locally-hosted environment to SirsiDynix’s SaaS environment. We are also moving forward with SirsiDynix’s BLUEcloud suite. We said goodbye to an old friend, A-to-Z Admin, and migrated to EBSCO’s new interface, Full Text Finder with Holdings Link Management. Many of us have had to rethink our collection development policies, moving from traditional print to predominantly electronic collections with new emphasis on e-Books and e-Textbooks, as well as reinvent library spaces. As with most journeys, we have experienced a few bumps and bruises, with the possibility of more to come along the way. However, we will continue to weather any storm as we always do—together.

In light of our recent experiences, this year’s conference is focused on embracing change and taking advantage of opportunities that come our way.

Remember to take advantage of the number of rest areas, patios, and meeting rooms available in the facility for networking and collaborative opportunities. There is also a selfie booth if you would like to take a break for a bit of light-hearted fun with friends and colleagues. Please share your memories with us!

We would like to thank everyone who submitted presentations and posters for this event. We would like to thank our sponsors for their generosity: EBSCO Information Services, SirsiDynix, IEEE, LearningExpress, Annual Reviews, CAS, Credo Reference, Gale Cengage, OCLC, Thomson Reuters, and Marcive. Most of all, we would like to thank all of you for attending and bringing your expertise to LUC 2015. You, our partners, have the vision, knowledge, experience, and motivation to carry us into the future. We look forward to experiencing LUC 2015 with each of you!

The LOUIS Team

Without change there is no innovation, creativity, or incentive for improvement. Those who initiate change will have a better opportunity to manage the change that is inevitable. —William Pollard

Event Staff
Members of the LOUIS Team will be stationed at an information table, as well as circulating through the facility, if you require any assistance. The information table is located in the Auditorium lobby. Team members are designated by staff badges.

Vendor Giveaways
Vendor giveaways are located in the Lower Concourse.

Menu

Wednesday
Breakfast: Grits bar, muffins, cinnamon rolls, bagels, fresh fruit, and juice
Lunch: Baked pork loin, grilled chicken breast, angel hair pasta with grilled crimini mushrooms, carrots & broccoli topped with grilled tomato and parmesan, scalloped potatoes, steamed mixed vegetables, salad, dinner roll, apple crisp

Reception
Crawfish pie, assorted finger sandwiches, shrimp dip, cream cheese stuffed jalepenos, assorted cheese and vegetable trays, lemon bars, amaretto brownie bites

Thursday
Breakfast: Assorted muffins, cinnamon rolls, danishes, bagels, fresh fruit, yogurt and juice
Lunch: Sandwich and salad bar, cookies

Beverage Service
Coffee, hot & cold tea, and water provided.

Reserved Tables
The LUC Awards Committee has a reserved table at lunch on Wednesday, October 7, 2015.
Parties interested in discussing the e-Textbook initiative have a reserved table at lunch on Thursday, October 8, 2015.

LUC 2015 in Social Media
Tell us about your conference experience and share photos. Tag @louislibraries and use #louisuc2015 in your status updates and tweets.
Facebook, Twitter, and now on Google+ and Instagram!

#Selfie Booth
LUC 2015 features a selfie booth, where you and your friends can gather and make memories. Complete with selfie sticks and fun accessories!
Tag @louislibraries and use #louisuc2015 when you post your #selfie.

Academic Meet ‘n’ Greet
Interested in meeting other newish librarians in Louisiana? The LLA New Members Round Table is the group for you! Catering to the needs of new and budding information professionals*, NMRT is hoping to get more academic librarians involved and networking in the state. So please, stop by and learn about what exciting things we have planned for the coming year!
Rum House—Wednesday, October 7 at 5:45PM

Main Auditorium A

9:00—10:00am

From the Dewey Decimal System To Distributed Classrooms: The Voyage of a Librarian’s Son
Main Auditorium A
My mother’s time as a music and art librarian at the New York Public Library, helped set me on the path of my 35+ year career in both the academic and military worlds. While a personal journey, I will focus on the teaching/learning/research trinity which has changed dramatically during that time, in large part due to the technology represented by the LOUIS consortia. While not a discussion of “disruptive innovation” per se, my theme is the need to embrace change.
Dr. Joseph C. Rallo, Commissioner of Higher Education

Breakout Sessions
10:15—11:15am

Adding Document Delivery Services to an Interlibrary Loan Department
Room 326
The ILL Department in Southeastern Louisiana University's library first began dabbling in article delivery in the fall of 2012. Initially the service was offered on a limited basis as it was reserved for students enrolled in distance-education programs (primarily through the Nursing Department). However over the last 3 years the service has grown and expanded, and now Document Delivery is available to all of our library’s users. This presentation will discuss how the Document Delivery service was implemented into ILL, and how the department’s policies and workflows have changed as a result. Additionally it will illustrate how ILLiad’s Document Delivery module is utilized to process these article requests. Questions and discussion will be encouraged throughout the session.
Amy Baptist
Topics: Inter-library Loan

Alt-Advocacy in Special Collections: Collection, Preservation and Long-Term Access to Louisiana alternative publications in the Digital Age
Room 327
Alternative press publications in print present interesting challenges and opportunities for libraries to advocate for alternative cultural history sources in Louisiana. Holdings of free weeklies and irregular art, music, and political magazines have significant research value for researchers, but at the present time libraries may not have policies that can accommodate changing issues relating to collection development, long-term access, and digital preservation. With the vigorous community of printmakers, illustrators, artists, zinemakers, and activists who are producing what could be considered ephemeral materials that speak of 21st century alternative culture, there is, most often, no direct digital equivalent. This panel explores the ways that libraries can approach this latter group of sources as a collecting area for special collections and establish outreach relationships that could pave the way to digital preservation. Panelists and attendees will also discuss potential methods for fostering collaboration and awareness in alternative publishing culture about the long-term value of these materials as reflections of Louisiana culture.
Joshua Lupkin, Sean Benjamin, and Jessica Lacher-Feldman
Topics: Acquisitions & Collection Development, Archives, Special Collections, & Institutional Repositories
Planning a Library-Wide Open House: Data-Driven Decision Making in Action
Room 324
In February and October of 2014, LSU Libraries hosted two open house events to highlight services and resources available to LSU undergraduates. Data collected from the pilot event in February was used to determine the feasibility of an annual open house. Likewise, the data collected from the subsequent October open house was useful in facilitating change for future events. Join librarian Rebecca Kelley, chair of the LSU Libraries Open House Planning Team, as she discusses how data-driven decision making can be used in event planning.

The Remedial Challenges Faced by College Students
Main Auditorium B
Colleges continue to encounter the challenges of educating and offering tools students need in order to be successful. One challenge is the dropout rate faced by both 2-year and 4-year academic institutions. To succeed in today's fast-paced, information-driven economy, students need strong basic skills to communicate effectively, solve problems, and work efficiently. Colleges are also challenged to provide students with effective remedial resources to improve retention, enable academic success prior to graduation, and assist them in moving into careers. Students frequently need valuable added skills practice to master the subject matter, stay engaged, and graduate. By helping students get and stay on the right track academically, colleges can better support students' career goals and get them workforce ready. Planned is a discussion of how LearningExpress can assist in identifying the issues facing a rising percentage of students and work with academic institutions to address them.

Mike Harwell
Topics: Electronic Resources, Vendor Products & Services, Public Services & Outreach

SciFinder
Room 322
SciFinder is a research discovery application that provides unlimited access to the world's most comprehensive and authoritative source of references, substances and reactions in chemistry and related sciences. SciFinder offers a one-stop shop experience with flexible search and discover options based on user input and workflow. You can search for substances, reactions, and patent and journal references anytime, anywhere. Make better, more confident decisions knowing that you have access to the largest collection of substances, reactions, and patent and journal references produced, compiled, and updated daily by CAS scientists around the world. Save time with an array of powerful tools to search, filter, analyze and plan that allow you to quickly find the most relevant answers to your research questions.

Ready, Set, GO: Making the Move from FirstSearch to WorldCat Discovery
Room 322
The LOUIS FirstSearch subscription supports searching WorldCat and other databases on

11:30am—12:30pm
WorldCat Discovery Services. WorldCat Discovery goes beyond FirstSearch to provide access to 1.8 billion items in WorldCat and a central index of more than 2,100 e-resource collections plus mobile views, web visibility and much more. Come see WorldCat Discovery, how it works and how you can begin your library’s transition to this new, modernized service.
Suzanne Butte

Topics: Acquisitions & Collection Development, Electronic Resources, Inter-library Loan, Public Services & Outreach, Technical Services

Sharing Session: Planning, Outreach, Public Relations
Room 327
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, public relations, outreach, library management and planning, this sharing session is for you!

SirsiDynix Updates: What's New with SirsiDynix?
Main Auditorium A
We'll have a few company updates, and we will give you an overview of recent and coming software releases, including exciting developments with BLUEcloud Campus, our academic libraries initiative.
Ranny Lacanienta

Weeding Round-Up
Room 326
Word has spread around the state about ULM's conversion to a primary digital library model. In pursuit of that project, the Library is undertaking an aggressive weed: the collection is being reduced by half. This presentation will describe the deselection project, its intentions, faculty involvement, adjustments made for faculty involvement, associated challenges with the project, lessons learned from those challenges, and how we plan to move forward in the next year - the second year of a two-year project. It will make recommendations, identify best practices for similar deselection and/or digital projects in the future.
Megan Lowe and Charles Hughes
Topics: Acquisitions & Collection Development, Cataloging, Library Management & Planning, Public Services & Outreach, Technical Services

1:45—2:45pm

Beyond Excel: Using Access for Fun and Productivity
Room 324
You, too, can quickly learn to manage and streamline a variety of library projects using Microsoft Access! Presenter will demonstrate the mechanics of creating and linking Access tables; show basic searching, filtering, display options; demystify the all-important queries; cover importing and exporting information into and out of your shiny new database; and discuss the pros and cons of managing your information in Access versus Excel.
Karen Cook
Topics: Acquisitions & Collection Development, Cataloging, Library Management & Planning, Public Services & Outreach, Technical Services

Embracing the Framework: Exploring Approaches for Implementation
Room 327
This sharing session/roundtable will discuss the different ways that librarians have begun or are already integrating the Framework in their instructional landscape. Regardless of one's instructional role, e.g., credit, embedded, one-shot, this roundtable will serve as an open laboratory for discussing or sharing Framework implementation approaches. The takeaway of this roundtable would be to generate ideas, strategies, and enthusiasm for
what could work in your academic setting. The presenters will provide up to three discussion questions and related handouts.

Penny Hecker and Angela Balius
Topics: Information Literacy

Making Meaning from User Analytics
Main Auditorium A
New integration with web analytics platforms such as Google Analytics and Piwik allow EBSCO Discovery Service libraries to see how users interact with the interface. In addition to basic traffic information that describes how many interactions users have in EDS, libraries can now see how often limiters and facets are used, which customizations make an impact, and what types of materials students and researchers are using. These data elements can be used to power visualizations and graphical dashboards to bring the activity that happens in EDS to life! With these new data, what kind of meaning can we make that helps us tell the story of our libraries? Come see the new data available at your finger tips and help brainstorm ways to turn it into actionable reports.

Eric Frierson

Technical Services in the 21st Century Academic Library
Room 326
This presentation will address major challenges and opportunities facing technical services departments in academic libraries, assessing our current environment and looking forward 5 to 10 years. The presentation will be limited to 5 hot topics in technical services - tentatively: scholarly formats, space/backlogs, transitioning/overlapping workflows, linked data and evolving standards, and resources and access management systems. The session is intended to be conversational and spark discussion among attendees.

Sally Krash

What's New @ IEEE Xplore
Room 322
Overview of new features, functionality and content available in the IEEE Xplore Digital Library, including:
- Get an in-depth look at some of the new features including remote access, MathJax, patent citations, and interactive HTML
- Hear the answers to the most frequently asked questions, see instructional demos, and learn about the benefits of these enhancements
- Learn about new IEEE journal titles coming soon and collaborations with other publishers
- Plus get a sneak preview into future plans for the IEEE Xplore Digital Library

The Academics Are Coming! The Academics Are Coming!
Room 324
Technically, we’re already here! Whether you are currently a member of the Academic Section of LLA or not, we want to meet you! Hear about what we have planned for the coming year and share your own ideas, too! So take a break from the conference to network and see how you can benefit from membership in the Academic Section. Prizes will be available.

LSU’s E-Textbooks Project: Strategy, Implementation, and Moving Forward
Main Auditorium A
LSU Libraries recently launched an e-textbook initiative to provide students free access to required textbooks. The Libraries identifies required textbooks that are available in the e-book collection. In the 2014-2015 academic year, the initiative has had the potential to save students $462,342.30, helping to offset the escalating cost of higher education while ensuring access to materials critical for student success. This presentation will discuss how to get an e-textbook initiatives up and running. We will discuss the types of e-books to buy so they can be used by an unlimited number of students simultaneously, how to access and search the bookstore’s required textbook lists, and strategies for promoting the initiative. We will also discuss ways to expand the impact of the program, including a faculty-focused e-textbook search.

Quick Start, Quick Results: Implementing CONTENTdm at Xavier University of Louisiana Library
Main Auditorium B
Are you interested in building a digital library but are unsure where to start? Are you worried about the costs or think you lack the expertise to make it happen? Xavier University of Louisiana Library recently implemented the CONTENTdm Digital Asset Management System through a no-charge, entry level option from OCLC called Quick Start. With your other OCLC subscription services you may already be eligible to take advantage of this option. In this session for CONTENTdm newbies, we will show you the basic skills you need in order to implement this system and begin building your digital collections online.
Kevin Hébert and Irwin Lachoff

Sharing Session: Library Systems
Room 327
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, library technology systems of all kinds (ILS, printing, booking, etc), this sharing session is for you!

Web of Science - Expanding Journal Coverage, Adding New Metrics, and Upcoming Enhancements
Room 322
Recent years have seen a flood of original research issuing from every country and region in the world. To meet the demands of the global research community and be reflective of the global body of science and scholarly activity, Thomson Reuters continually seeks to complement its coverage of top
tier, highly cited international journals with an appropriately broad representation of the world’s best regional literature. In addition, Web of Science has incorporated new metrics around citation counts and usage to help users uncover high impact pieces of research.

Join us as we review the expanded metrics being added to Web of Science and the impact and implications of Thomson Reuters’ increased focus on regional journal coverage and content from rapidly emerging and increasingly influential regions in Web of Science

Aesthetically Pleasing and Useful: Xavier University of Louisiana Library Renovations Continue
It was at the LOUIS Users Conference (LUC) in 2013 that three Xavier University librarians first presented their ideas for renovating their library. At that time, the Xavier Library had not undergone any renovations for aesthetic or functional reasons with the exception of repairing carpet and furniture damage experienced during Hurricane Katrina in 2005. This poster illustrates how discarding items formally collected in print and currently collected electronically, gave new life to the research spaces at the Xavier University of Louisiana Library.

Nancy Hampton, Paula Singleton, Paul Haschak, Herbert McGuin
Topics: Acquisitions & Collection Development, Electronic Resources, Library renovations, Repurposing Space in Libraries

Board of Regents Application and Project Workflow
Each year the Louisiana Board of Regents awards around $2 million worth of grants to campuses around the state. This poster session will walk through the process that the UNO Library went through to obtain an equipment grant in support of Computer Science and the Film Arts program with the goal of developing and interdisciplinary course for video game development. The poster session will highlight some of the issues that developed in writing the grant, look at state purchasing requirements, and ultimately development of library space into an Innovation Lab.

Lora Amsberryaugier

Non-profits, Tax Exempt Status, and You
Are you thinking of starting a non-profit? Are you sure your organization’s status is valid? How do you file? What code section is right for you? Taxes are boring but important to think about! There are different types of non-profit organizations and different code sections for each, but tax exempt status isn't automatic. This poster will detail ACRL-LA’s decision to change its tax exempt status section under Internal Revenue Code section 501(c), the process to apply for exemption, Louisiana State and Federal forms to file, and other considerations involved with non-profits and tax exemption.

The Accidental Digitizer: A Non-Expert's Guide
Room 327
What happens if a digitization project is thrust upon you? Where would you even start? The presenter will discuss the planning and beginning stages of digitizing the David R. Williams Collection from UL Lafayette's Special Collections for inclusion in the Louisiana Digital Library. Topics covered will include selecting material to digitize, evaluating existing resources in your library to accomplish the task, and challenges experienced along the way.
Allison Gallaspy
Topics: Archives, Special Collections, & Institutional Repositories, Web Resources, Digitization

BLUEncloud Visibility
Main Auditorium A
Bibframe and Linked Data in the SirsiDynix BLUEncloud -- Linked Data and Bibframe hold the promise of discovering library material through regular web searches, without the need to search from the library's discovery layer. Come learn about the possibilities.
Berit Nelson
Topics: SirsiDynix Products & Services

Data Wrangling with OpenRefine
Main Auditorium B
Is your data running loose in your library? OpenRefine is a tool that can help libraries more easily view, analyze, clean, and match large data sets. It is particularly useful for digital projects, statistics, or user data. This presentation will describe how OpenRefine is different from spreadsheets, datasheets, and programming. It will also include demonstrations of some of the most useful functions in OpenRefine, compatible tools, and solutions it provides to would-be data wranglers. Examples will include real-life problems that LSU Libraries has encountered in its cataloging and digital projects.
Rachel Tillay and Mike Waugh
Topics: Archives, Special Collections, & Institutional Repositories, Cataloging, Statistics, Technical Services

Gale Virtual Reference Library
Room 322
The presenter will walk attendees through the e-book collection and provide a thorough overview of the collection. She will also talk about newer editions. The presenter is a trainer for Gale/Cengage Learning.
Emily Mageski
Topics: Electronic Resources

How to Prepare for an Accreditation Committee
Room 326
I will talk about the steps I take to prepare for a visit from an accreditation committee. This will include the program review documents I create and the making of a libguide if one doesn't yet exist for the program in question. I will also mention pulling a cart of physical resources and marking relevant Dewey ranges on the shelves.
Caitlin Cooper
Topics: Acquisitions & Collection Development

Real World Ready: Experiential Learning and Academic Libraries
Room 324
In 2015, Southeastern Louisiana University adopted a new QEP entitled "Real-World Ready," which focuses on experiential learning. Our university thus joins other academic institutions revising their curricula to increase practical, authentic experiences for students. This trend reflects the increasing number of professions that expect graduates to exhibit a holistic knowledge that blends theory with practice. After attending a series of workshops and researching experiential education in academic libraries, we feel that academic librarians are in one
of the best positions to support such learning initiatives and projects. In this session, we will share what we have learned through these experiences and our own teaching of an information literacy course. If you want to learn about experiential learning in general or its specific appearances in academic libraries, then this session is for you! Note that session attendees will participate in an activity, but no outside materials will be required.

Elizabeth Sanders and Angela Balius
*Topics: Acquisitions & Collection Development, Information Literacy, Public Relations & Marketing*

**9:45—10:45am**

**E-Books @ LSU: Moving away from the DDA model**
Room 327

In early fall of 2014, LSU Libraries discontinued demand driven acquisition (DDA) plans and removed the majority of e-books with Digital Rights Management (DRM) from the collection. In their place, the Libraries focused on investing in large e-book collections that met 3 essential criteria: DRM-free titles that allowed for an unlimited number of users and provided perpetual access. DDA has been described as an acquisitions strategy to move from a "just-in-case" to "just-in-time" collection model, allowing the library to be more responsive to user needs than traditional acquisition models. Yet, collection analysis and ROI statistics demonstrate how the large e-book package model has met user demands while allowing us to collect for the present and future. This model removes the roadblocks to usability, allowing users to easily access and download e-books. Finally, the model has allowed the Libraries to pursue an innovative project that aligns the Libraries’ e-book collection with required course textbooks to provide students with free access to required materials.

Emily Frank and Alice Daugherty
*Topics: Acquisitions & Collection Development, Electronic Resources, Other Vendor Products & Services, Statistics*

**Literati Platform Training and Usage Workshop**
Room 322

This hour long demonstration will offer an overview of the e-reference content, Topic Pages, tools and search functionalities within Literati -- which is available to all LOUIS institutions. After examining the ways in which your library users can conduct research on the Literati platform, we'll share our ideas and best practices to increase Literati usage overall within your community. We’ve made enhancements and updates to the platform in the last year (including responsive design for mobile users), so be sure to join us for a look at what's new!

Lisa Hill
*Topics: Electronic Resources, Other Vendor Products & Services*

**LOUIS Training Focus Group**
Main Auditorium B

LOUIS has always had a commitment to provide quality training to its membership. However, LOUIS has recently renewed its commitment to provide training based on feedback provided through various surveys and reports. One outcome is the development of the LOUIS Training Hub, a one-stop-shop for all training resources. This focus group will allow LOUIS to debut the training portal to a smaller audience and discuss what it currently has and what the membership would like to see. We will also discuss other training opportunities available to the membership.

Jaime Barrilleaux

Showin' Your Stuff: Poster Session Success
Room 324
Poster sessions are a common and popular presentation format at many kinds of conferences, and competition for poster session slots is often strong. This session describes how to create aesthetically-pleasing posters and how to develop winning proposals. Examples of good and not-so-good posters will be included, along with tips on design, printing, transportation, and display. And of course, the presenters will advise on how to talk about your poster's topic with conference attendees.
Eric Johnson and Beth Stahr
Topics: Professional Development

SirsiDynix Symphony Migration to SaaS and BLUEcloud Campus Updates
Room 326
The presenter will provide an update on the SirsiDynix Symphony Migration to SaaS and will also share the latest news about LOUIS and BLUEcloud Campus products.
Cathy Sicard
Topics: SirsiDynix Products & Services

The State of EBSCO
Main Auditorium A
The presenter will discuss and describe EBSCO’s ongoing strategy for library partnership, the YBP and LearningExpress acquisitions, EBSCO benevolence, and EBSCO’s long term vision for the industry.
Steve O’Dell
Topics: EBSCO Products & Services

11:00am—12:00pm

Downloads, Dollars, and Data - Journal Collections as Databases
Room 322
Evaluating any "Big Deal" content offer from a publisher can be daunting to the point that many libraries choose to not consider them at all. Often the assumption is that it is "too expensive" and the philosophy is "we only want 50 titles, why buy 700 of them?" This is a presentation of usage, turn away, ILL, and cost-per-download statistics to tell the various good, bad and ugly stories of large journal package purchases. We will examine title-by-title and Big Deal scenarios from the smallest to the largest libraries. We will present a candid view of pricing structures and some of the calculations publishers use to discount.
Andrew Gardner and Jennifer Jelinski
Topics: Acquisitions & Collection Development, Electronic Resources, Statistics

The Google Driver's Manual
Room 324
Google Drive can be a great resource for anyone. From the school librarian helping a student write his first bibliography to the academic librarian helping a grad student work on her thesis to the public librarian helping a patron write the great American novel, Google Drive is a great option for librarians to share with their patrons. Learn all the tricks Google Drive can do for you and your patrons (and maybe even your library).
Sonnet Ireland

Sharing Session: Digital Libraries and Repositories
Room 327
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, digital libraries and institutional repositories, this sharing session is for you!

SirsiDynix BLUEcloud Analytics
Main Auditorium A
SirsiDynix Blue Cloud Analytics is a powerful new reporting tool from SirsiDynix. Use a graphical interface to produce lists or make it colorful with
charts, graphs, heat maps, etc! You can even produce pdfs that will allow viewers to interact with data.
Lisa Witteman
*Topics: SirsiDynix Products & Services*

**The Weeding Planner**
Room 326
Weeding is an integral part of the collection development cycle and should be done on a continuous basis, but when LSU Libraries was tasked with weeding and shifting a large portion of its collection within a short time period to accommodate remodeling, a more radical approach was necessary. Project planning and communication were vital for efficient workflows and productive work relationships. Discussing concerns before the beginning of the project created a plan that took into account the knowledge and concerns of all stakeholders, including managers, librarians, and those working in technical services and stacks maintenance. Understanding the role and challenges of each stakeholder allowed us to plan for most potential problems before they happened. Join us to find out what we learned about collaboration and large-scale weeding projects.
Andrea Hebert, Cristina Caminita, Jason Juneau
*Topics: Acquisitions & Collection Development, Library Management & Planning*

1:15—2:15pm

**The Fault of Our STAR Committee**
Room 324
For the last two years, Jennifer Jackson has been Chair of the STAR (Successful Transitions to Academic Research) Committee for ACRL-LA. Due to an array of responsibilities and tasks as the Learning Commons and Instruction Librarian for Earl K. Long Library, the ability to increase membership has been challenging. Desperately wanting to give the committee the attention it so deserves, she hopes that this encounter will encourage any and all librarians who work to promote information literacy at all levels (K-12 and secondary education) to participate in the growth and development of the committee. Presented will be the history and the mission of the STAR Committee, as well as a five year outlook plan and discussion for the committee. Anyone interested in participating and becoming a new member is encouraged to attend.
Jennifer Jackson
*Topics: Information Literacy*

**From Liaison to Departmental Librarian: Increasing Outreach to University Faculty and Students**
Room 322
In 2013, Dupre Library's Departmental Librarian program transitioned from a liaison program to a more embedded librarian model. In the process the program has undergone several changes in an effort to expand services to different departments and student groups in the UL-Lafayette community. Join librarians Andrea Flockton and Jeremiah Paschke-Wood as they detail the evolution of the program, problems they've faced along the way and goals moving forward.
Jeremiah Paschke-Wood and Andrea Flockton
*Topics: Public Services & Outreach*

**Making WorkFlows XML Report Output Work For You**
Main Auditorium A
The delivered stylesheets for WorkFlows XML report output are not always user friendly. Once opened in Excel, you can end up with an overwhelming number of columns or data split into multiple rows. This session will demonstrate how to create stylesheets without having to be an expert with XML or XSL.
Natalie Palermo
Sharing Session: Statistics and Assessment
Room 327
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, library statistics and assessment, this sharing session is for you!

2:30—3:30pm

Crossing the "Threshold" of Critical Thinking's Role in Information Literacy
Room 322
It seems obvious to me that most of the "critical thinking" segments of information literacy education are in need of a major overhaul. We (and I include myself in this number) traditionally teach [...] Stephen Sanders
Topics: Information Literacy

A Flickr of Metadata: Tales from a Crowdsourcing Project
Main Auditorium B
When your archival collection has a thousand photographs with no identifying information, what can you do? This presentation will address the pros and cons of using Flickr as a crowdsourcing platform while covering additional topics such as: digitization workflows, obtaining institutional buy-in, and promoting discovery. Examples will be drawn from a recent project undertaken by the LSU Law Library. Travis Williams
Topics: Archives, Special Collections, & Institutional Repositories, Electronic Resources, Public Relations & Marketing, Web Resources

Navigating Reclassifying from Dewey to LC: Reclass Rehash
Main Auditorium A
In November 2011, Ellender Memorial Library at Nicholls State University began reclassifying its stack collection from Dewey Decimal to Library of Congress. This presentation examines the intervening years' progress from technological, cataloging, and circulation perspectives, with an emphasis on how those viewpoints changed with personnel and resources. As capacity increased in Technical Services, how did Access Services respond? What preliminary legwork had to be completed? What logistics demanded discussion to preserve patron satisfaction while undergoing this massive project? How was the reclassification originally envisioned? What were unexpected issues? How did the different units respond? This presentation will address these questions and generate dialogue about how other universities have undertaken this project. Through dissecting our own process, we can receive input as to pitfalls and guidance as we go forward. John Bourgeois, Michael Arseneau, William Charron
Topics: Cataloging, Circulation, Technical Services

Sharing Session: Access Services & Public Services
Room 326
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, public and access services, this sharing session is for you!

Sharing Session: Discovery and Electronic Resources
Room 324
The topic of discussion this year is e-books, e-textbooks, and open educational resources (OERs).
Come share your successes and challenges in identifying, purchasing, and encouraging the use of these formats. Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees.

**Sharing Session: Technical Services**  
Room 327  
Sharing sessions are facilitated for the explicit purpose of sharing ideas, experiences, and best practices. These sessions allow you to step away from the traditional breakout sessions and engage in a more informal exchange with fellow attendees. If you are interested in, or have questions about, technical services, this sharing session is for you!
